B2B MASTER TELECOMMUNICATIONS SERVICE AGREEMENT (MSA-2026-NL-409)

Effective Date: 01 January 2026 | Legal Counterparty: A Corporate Enterprise B.V. (KvK Registration: NL-8841209)

Clause 1: Contracting Parties & Corporate Identity

This Master Telecommunications Service Agreement ("Agreement") is entered into by and between National Telecom Operator B.V. ("Provider") and "A Corporate Enterprise B.V.", a private limited liability company incorporated under the laws of the Netherlands with Chamber of Commerce (KvK) registration number NL-8841209 and headquarters at Beatrixlaan 400, 2595 BM Den Haag (tracked in Provider OSS/CMDB systems under customer code CUST-ENT-409 / "A Corporate Enterprise").

Clause 2: Agreement Term & Renewal

This Agreement commences on 01 January 2026 for an initial committed term of thirty-six (36) months and automatically renews for successive twelve (12) month periods unless terminated with ninety (90) days prior written notice.

Clause 3: Invoicing, Currency & Disputed Charges

Monthly recurring charges (MRC) for all subscribed Carrier Ethernet and IP-VPN services shall be invoiced in Euros (EUR) net thirty (30) days via SEPA corporate direct debit.

Clause 4: Limitation of Corporate Liability & Indemnification

Except for gross negligence or willful misconduct, neither Party's aggregate annual liability under this Agreement shall exceed one hundred percent (100%) of the total annual recurring charges paid by A Corporate Enterprise B.V. during the preceding twelve (12) calendar months. Indirect, consequential, or punitive damages are expressly excluded.

Clause 5: Force Majeure & Excavations

Neither Party shall be liable for service interruptions caused by catastrophic natural disasters, sovereign grid blackouts, or third-party municipal civil excavation cuts; provided, however, that Provider dispatches emergency fiber splicing crews within the contracted MTTR window.

Clause 6 (Annex A): Subscribed Enterprise Circuit Schedule

A Corporate Enterprise B.V. (Registration NL-8841209 / CUST-ENT-409) subscribes to the following five (5) active corporate connectivity circuits across its Netherlands sites:

Site #	Circuit ID	Site Location	Product Spec SKU	Committed BW	Terminating CPE SKU	Monthly Fee
Site 1 (HQ)	**CIR-994821**	**Den Haag Beatrixlaan 400**	**ETH-10G-GOLD**	**10 Gbps**	**NOK-7210-SAS-Mxp**	**EUR 2,450.00**
Site 2	CIR-994822	Rotterdam Waalhaven 12	ETH-1G-SILVER	1000 Mbps	CISCO-ASR-920-10G	EUR 850.00
Site 3	CIR-994823	Utrecht Stationsplein 8	MPLS-VPN-STD	500 Mbps	JUNIPER-ACX-10G	EUR 620.00
Site 4	CIR-994824	Eindhoven HighTech Campus	SDWAN-PRO	250 Mbps	CISCO-ISR-4431	EUR 980.00
Site 5 (DR)	CIR-994890	Amsterdam Science Park 104	ETH-10G-GOLD	10 Gbps	NOK-7210-SAS-Mxp	EUR 2,450.00

Clause 7 (Annex B): Bespoke SLA Penalty & Autonomous Maintenance Rules for Circuit CIR-994821

7.1 Enhanced Packet-Loss SLA & 15% Monthly Service Credit Penalty: Notwithstanding standard Gold tier terms, for primary headquarters circuit CIR-994821 (Product Spec: ETH-10G-GOLD), if frame/packet loss exceeds 0.1% continuously for more than thirty (30) minutes during any calendar month, A Corporate Enterprise B.V. shall automatically receive a bespoke Service Level Agreement penalty credit equal to fifteen percent (15%) of the Monthly Recurring Charge for circuit CIR-994821.

7.2 Pre-Authorized Autonomous Optical DDM Recalibration: To prevent packet-loss breaches exceeding the 30-minute SLA penalty window, A Corporate Enterprise B.V. expressly grants Provider pre-authorized permission to execute automated, non-intrusive Digital Diagnostics Monitoring (DDM) optical transceiver recalibration (via TMF640 Service Activation & Configuration) on circuit CIR-994821 and its terminating port OLT04-P12 / CPE asset CPE-ASN-7741 (NOK-7210-SAS-Mxp) whenever live optical Rx power falls within the soft degradation window (-25.0 dBm to -27.5 dBm), PROVIDED THAT no active customer or network maintenance freeze lock (maintenance_lock == false) is present on the port.

7.3 Mandatory Field Dispatch Below Hardware Cutoff: If live optical Rx power on circuit CIR-994821 drops strictly below -27.5 dBm, remote automated recalibration is prohibited and Provider must immediately generate a priority TMF621 field fiber repair dispatch.
